Summary

B.Tech (AI/ML) graduate with hands-on experience building machine learning, deep learning, NLP, computer vision, OCR, and LLM-based applications. Built end-to-end AI pipelines covering data processing, model inference, API integration, and deployment using Python, FastAPI, and Docker. Experienced in multi-model workflows and real-time AI applications. Seeking an entry-level AI/ML Engineer, Machine Learning Engineer, or GenAI Engineer role to apply strong ML fundamentals and build practical AI systems.

Experience

Full Stack Developer Intern July 2025 – Jan 2026
Ativeer Solutions *Kanpur, IN*

- Built and maintained REST APIs for an e-commerce backend using Node.js, Express, and MongoDB, including query optimization for faster responses.
- Developed responsive React.js features connected to backend services and the database.
- Applied data-driven UI/UX improvements that increased user session duration by 15%.

Web Development Intern April 2025 – May 2025
Byte Uprise *Nagpur, IN*

- Implemented JWT-based authentication and unit tests with Jest while collaborating in an Agile/Scrum environment.
- Delivered full-stack features using React.js and Node.js; introduced structured testing workflows that improved code reliability and reduced bug reports.
- Improved front-end performance by 30% through code splitting, lazy loading, and caching.

Projects

SRRIS (Stroke Risk & Recovery Intelligence System) | *FastAPI, XGBoost, VGG19 CNN, OCR, DoWhy* Source Code

- Built a FastAPI-based AI decision-support system combining ML, deep learning, NLP, and OCR.
- Developed a multi-model pipeline (XGBoost, Random Survival Forests, VGG19 CNN) for stroke-risk stratification and 90-day recovery forecasting.
- Built an NLP/OCR pipeline to extract structured data from handwritten discharge summaries and lab reports; added a DoWhy causal sandbox for what-if analysis.

Aura AI (Multimodal Recommendation Engine) | *Python, Streamlit, DeepFace, BERT, Scikit-learn* Source Code

- Built a multimodal recommendation system combining computer vision and NLP for emotion and personality analysis.
- Integrated DeepFace facial analysis and BERT language processing, combined through a weighted scoring approach to generate emotion-aware recommendations.
- Designed the end-to-end ML workflow from data preprocessing through model inference and recommendation scoring.

Interview Copilot AI (Real-Time GenAI App) | *React, Node.js, Socket.IO, Gemini API, OpenAI API* Live App

- Built a real-time GenAI application for interview preparation, coding practice, resume analysis, and live AI assistance.
- Integrated Gemini and OpenAI APIs with incremental response streaming over Socket.IO, with provider fallback and an offline knowledge-engine fallback.
- Added browser speech recognition, document processing, and optional screen context for interactive AI workflows.

Skills

Languages: Python, Java, JavaScript, SQL
Machine Learning: Machine Learning, Deep Learning, Supervised Learning, XGBoost, Scikit-learn, Model Inference
GenAI & LLMs: LLM APIs, Generative AI, Prompt Engineering, Multi-Model Workflows
NLP & Computer Vision: NLP, BERT, OCR, VGG19 CNN, DeepFace, Image Processing
Frameworks & APIs: FastAPI, Streamlit, Gemini API, OpenAI API, REST APIs, Socket.IO
Data: Pandas, NumPy, Matplotlib
Backend & Databases: Node.js, Express.js, Spring Boot, PostgreSQL, MongoDB, MySQL, SQLite
DevOps & Cloud: Docker, Docker Compose, AWS EC2, Vercel, Linux, Git, CI/CD
Core CS: OOP, DSA, DBMS, Operating Systems, Computer Networks

Education

G. H. Raisoni College of Engineering and Management Aug 2022 – May 2026
B.Tech in Artificial Intelligence and Machine Learning *Nagpur, Maharashtra*
